CONTRACT BETWEEN
MONTANA AGRICULTURAL EXPERIMENT STATION
RESEARCH CENTERS
and
MONTANA WHEAT AND BARLEY COMMITTEE

TITLE: Evaluation of various materials and practices contributing toward economic crop production under flexible, continuous and other cropping systems in Montana.

TIME PERIOD: July 1, 2012 to June 30, 2013

PERSONNEL: Research scientists at the following AES Research Centers:

1. Southern Agricultural Research Center (SARC) - Huntley
   Kent A. McVay, Crop Scientist & Coordinator
2. Northern Agricultural Research Center (NARC) - Havre
   Peggy Lamb/Ken Kephart, NARC Crop Research
3. Central Agricultural Research Center (CARC) - Moccasin
   David M. Wichman, Superintendent/Crop Scientist
4. Eastern Agricultural Research Center (EARC) - Sidney
   Joyce L. Eckhoff, Crop Scientist
5. Northwestern Agricultural Research Center (NWARC) - Kalispell
   Robert N. Stougaard, Superintendent/Weed Scientist
6. Western Triangle Ag Research Center (WTARC) - Conrad
   John Miller/David Wichman, WTARC Crop Research

COOPERATORS: Research Associates, Assistants, Technicians and Farm Managers at each research center, and cooperating producers hosting off-station research trials on farms across Montana.

OBJECTIVES:

1. To evaluate the effects of differing systems on crop and variety performance under diverse environments represented across the state of Montana.
2. To evaluate the potential fit of other materials, concepts and techniques with various cropping systems employed for cereal crop production.

BACKGROUND AND JUSTIFICATION:

An ever-increasing need is felt among Montana agricultural producers for development and implementation of new and/or refined materials and methods for enhanced economic efficiency in crop production.
PROJECTS:

I. Cropping System Investigations
   a. Evaluation of continuous spring wheat under minimum-till, no-till, and crop/fallow cropping systems -- EARC

II. Cereal Variety Performance Evaluations
   a. Hard Red & White Winter Wheat Trials
      i. Cooperative winter wheat evaluation nursery – NWARC
      ii. North central Montana off-station winter wheat variety performance evaluations – NARC
      iii. Evaluation of winter wheat cultivar performance under continuous-crop, crop-crop-fallow, and crop-fallow systems in central Montana – CARC
      iv. Evaluation of winter wheat cultivar performance under chemical fallow systems in the western triangle area of Montana – WTARC
      v. Off-station winter wheat variety performance trials in south central Montana -- SARC
   b. Hard Red & White Spring Wheat Trials
      i. Evaluation of spring wheat under dryland fallow, dryland recrop, and irrigated Conditions at on-station and off-station sites – EARC
      ii. North central Montana off-station spring wheat variety performance evaluations – NARC
      iii. Evaluation of spring wheat cultivar performance under continuous-crop and crop-crop-fallow systems in central Montana – CARC
      iv. Evaluation of spring wheat cultivar performance under chemical fallow systems in the western triangle area of Montana – WTARC
      v. Off-station spring wheat variety performance trials in south central Montana -- SARC
   c. Soft White Wheat Trials
      i. Soft white spring wheat evaluations in northwestern Montana -- NWARC
   d. Durum Trials
      i. Evaluation of durum under dryland fallow, dryland recrop, and irrigated conditions at on-station and off-station sites – EARC
      ii. Statewide durum yield trial – Evaluation of durum varieties and experimental lines in Montana – EARC
      iii. North central Montana off-station spring durum variety performance evaluations -- NARC
   e. Spring Barley Trials
      i. Evaluation of barley under dryland fallow, dryland recrop, and irrigated conditions at on-station and off-station sites – EARC
      ii. Off-station barley variety performance in northwestern Montana – NWARC
      iii. Evaluation of spring barley cultivar performance under continuous-crop and crop-crop-fallow systems in central Montana – CARC
      iv. Evaluation of spring barley cultivar performance under chemical fallow systems in western triangle area of Montana – WTARC
v. Off-station spring barley variety performance trials in south central Montana -- SARC

III. Disease Management
   a. Fungicide evaluations in spring wheat -- NWARC

IV. Other Studies
   a. Effect of plant growth regulators in spring wheat -- NWARC

PROCEDURES:

Scientific research procedures will be employed appropriate to each specific project listed herein.

APPLICATION AND RESULTS:

Results are available to the Montana crop producer as well as to the scientific community. All results from these investigations will be available in CD format by request and can be found on the web at the Southern Agricultural Research Center website (http://www.sarc.montana.edu/) as well as at the Montana Wheat and Barley Committee website (http://wbc.agr.mt.gov/).

CURRENT or PENDING BUDGETARY SUPPORT:

All projects included herein are partially supported by MAES funding to include scientist salaries. Projects included herein are not supported by other grants.

POTENTIAL FOR ENHANCED EXTRAMURAL FUNDING:

Much of the research conducted within this overall project is associated with the development of crop performance databases over substantial periods of time and numerous environments. While it is difficult to obtain most types of extramural funding for such work, the results arising from long-term investigations serve well in documenting base data for proposals toward other grant-supported research.

INCREASED COMPETITIVENESS DUE TO THIS FUNDING:

Much of the research associated with this project is conducted off-station on cooperating producer’s farms. The addition of important cropping environments differing from those represented by the fixed-location research facilities is additive to the overall databases employed to support producer decisions in cropping systems, crop and variety selection, crop nutrition, crop pest management and general agronomics.

NUMBER OF YEARS MWBC HAS FUNDED THIS PROJECT:

This Joint Research Center project has been funded by MWBC for 40 crop years (1972-2011) at various levels of total award beginning with $14,000 in 1972.
OVERALL BUDGET: (Individual Budgets by Research Center are attached)
